

# My Health eVet Quick Guide

## Disconnecting Accounts

Do you have your My Health eVet account **Connected** to external accounts? These accounts could include your DS Logon Level 2 or a 3<sup>rd</sup> party credential. Do you access your My Health eVet account directly from an external account?

If at any time you decide you no longer want your My Health eVet account connected to these other sites, you have the option to **Disconnect Accounts**.

Disconnecting your external accounts does not change or delete them. It will only unlink them from My Health eVet.

### For example:

If your DS Logon account is connected to your My Health eVet account, you may access My Health eVet directly through a link on eBenefits. You do not need to use a separate login.

When you disconnect your DS Logon account from your My Health eVet account, your accounts will be unlinked. You will no longer be able to access My Health eVet through eBenefits. You will need to go to the [My Health eVet](#) website to login with your My Health eVet User ID and Password.

To **Disconnect** your external accounts from your My Health eVet account:

- **Log** into your My Health eVet account
- **Select** the Personal Information tab
- **Select** the My Account icon
- **Select** the **Disconnect Accounts** link
- **Follow** the steps to disconnect your accounts

**Note:** You can always reconnect external accounts to your My Health eVet account. To learn more about connecting your accounts, visit **Connecting Accounts:**
